

The board is the truth

Workshop software for independent Australian shops.

GST invoices. Tablet authority. Owner KPIs.

Request a demo — self-serve trial is paused.

The leak

Whiteboards lose labour.

Quotes become invoices without authority.

GST fields get re-typed at month-end.

One job, one canvas

Every repair order moves left to right.

Advisors approve lines. Techs see My Day.

Change orders when the job grows (BR-006).

Money path

Estimate → authority → tax invoice → receipt.

Shop invoices are GST documents for your customers.

SaaS fees are a separate SPECIMEN path until our ABN is filled.

Industry forms

ATR, DVI, privacy collection, diagnostic authority,
aftermarket disclosure, SWMS, refrigerant logs.

Templates assist — not official RWC or Form 3.

Honesty

Live / Stub / Dry-run. No invented partner badges.

No SOC 2 report. No published uptime percentage.

No AU residency claim until Cloud SQL evidence.

Plans

Starter USD \$149 · Growth \$299 · Scale \$449.

Enterprise is quote. SMS extra when live.

Published list prices only.

Parts Exchange

Optional B2B add-on. Surplus and trade parts.

Delayed payout is not escrow.

Pilot legal — not consumer classifieds.

Day-0

First repair order in under 15 minutes.

Welcome pack + skippable tour.

Shared demo garage is fictional data only.

Security we will say

tenantId on every business row.

JWT + RBAC + portal tokens.

Second-shop isolation in e2e.

What we will not say

Connected partners.

WCAG certified.

Hosted in Australia (today).

Next step

Request a demo.

workshopwrench.com.au/demo

Walk the seeded garage. Then MSA.
